THE MARCONI REVIEW

JANUARY 1976 — DECEMBER 1976

VOLUME XXXIX NOS. 200 — 203

INDEX

VOLUME XXXIX NOS. 200—203

	Issue	Page
Antenna, Satellite Earth Station, Beam Waveguide Feed for	201	81
Antennas, Microwave, Avoidance of Radiation Hazards from	201	61
Application of Charge-Coupled Devices to Moving-Target-Indicator Filters	203	201
Avoidance of Radiation Hazards from Microwave Antennas	201	61
Beam Waveguide Feed for a Satellite Earth Station Antenna	201	81
Charge-Coupled Devices, the Application of, to Moving-Target-Indicator Filters	203	201
Detection Probability for a Group-Correlated Target Signal, the Determination of	202	139
Determination of the Detection Probability for a Group-Correlated Target Signal	202	139
Development of High Power, High Frequency Thyristor Inverters	203	173
Dual Polarization on Satellite Systems, Methods of Adaptive Cancellation for	200	1
Field Strength Curves, Ground Wave, Standard Reference Radiators for	202	117
Ground Wave Field Strength Curves, Standard Reference Radiators for	202	117
Group-Correlated Target Signal, the Determination of the Detection Probability for	202	139
Hazards, Radiation, Avoidance of, from Microwave Antennas	201	61
High Frequency Receiving Systems, Performance of	200	43
High Power, High Frequency Thyristor Inverters, the Development of	203	173

	Issue	Page
Inverters, Thyristor, the Development of High Power, High Frequency	203	173
Methods of Adaptive Cancellation for Dual Polarization Satellite Systems	200	1
Microwave Antennas, Avoidance of Radiation Hazards from	201	61
Moving-Target-Indicator Filters, The Application of Charge-Coupled Devices to	203	201
Orthogonal Polarization, Some Measurements at 23 cms Wavelength	200	25
Performance of High Frequency Receiving Systems	200	43
Polarization (Some Orthogonal) Measurements at 23 cms Wavelength	200	25
Polarized Poly(Vinylidene Fluoride)—Its Application to Pyroelectric and Piezoelectric Devices	203	189
Pyroelectric and Piezoelectric Devices, Application of Polarized Poly(Vinylidene Fluoride) to	203	189
Radiation Hazards from Microwave Antennas, Avoidance of	201	61
Radiators, Standard Reference, for Ground Wave Field Strength Curves	202	117
Receiving Systems, High Frequency, Performance of	200	43
Reflective Arrays, SAW, a Weighting Method for	202	155
Satellite Earth Station Antenna, Beam Waveguide Feed for	201	81
Satellite Systems, Dual Polarization, Methods of Adaptive Cancellation for	200	1
SAW Reflective Arrays, a Weighting Method for	202	155
Some Orthogonal Polarization Measurements at 23 cms Wavelength	200	25
Standard Reference Radiators for Ground Wave Field Strength Curves	202	117
Target Signal, Group-Correlated, Determination of the Detection Probability for	202	139
Thyristor Inverters, High Power, High Frequency, the Development of	203	173
Weighting Method for SAW-Reflective Arrays	202	155

THE MARCONI REVIEW

JANUARY 1977 — DECEMBER 1977

VOLUME XL NOS. 204 — 207

INDEX

VOLUME XL NOS. 204—207

	Issue	Page
Antenna Characteristics, Prediction of, from Spherical Near Field Measurements—Part I Theory	204	42
Part II Experimental Validation	205	117
Book Review: The Wave and Ballistic Theories of Light—A Critical Review	205	155
Charge-Coupled Devices, a Discrete Fourier Transform Processor Using	204	1
Clutter, Radar Strike Extraction in, Using Two-Dimensional Spatial Integration Techniques	207	197
Communication, Ship-Shore at Short Ranges	205	102
Development of a High Power Waveguide Switch for a Space Application	205	69
Discrete Fourier Transform Processor Using Charge-Coupled Devices	204	1
Exact Ray-Tracing Through the Bradley/Dudeney Model Ionosphere	206	172
Fourier Transform Processor Using Charge-Coupled Devices, a Discrete	204	1

	Issue	Page
Ionosphere, Exact Ray-Tracing Through the Bradley/Dudeney Model	206	172
Logic Simulation—Part I	206	157
Part II	207	236
Near Field Measurements, Spherical, the Prediction of Antenna Characteristics from—Part I —Theory	204	42
Part II—Experimental Validation	205	117
Prediction of Antenna Characteristics from Spherical Near Field Measurements—Part I Theory	204	42
Part II Experimental Validation	205	117
Radar Strike Extraction in Clutter Using Two-Dimensional Spatial Integration Techniques	207	197
Ray Tracing, Exact, Through the Bradley/Dudeney Model Ionosphere	206	172
Ship-Shore Communication at Short Ranges	205	102
Space Application, Development of a High Power Waveguide Switch for a	205	69
Spatial Integration Techniques, Two-Dimensional, for Radar Strike Extraction in Clutter	207	197
Synchronization, Clock, and Time/Frequency Dissemination	207	225
Time/Frequency Dissemination and Clock Synchronization	207	225
Waveguide Switch for a Space Application, Development of a High Power	205	69
